To Parents/Guardians:

Earlier this week, Envirotec – a company that provides environmental services, including hazardous waste management – was at our school as part of a routine process for managing and disposing of the chemicals in our chemistry lab. While they were at our school, they discovered a chemical that requires greater care for its disposal. As a result, the RCMP Explosive Disposal Unit from Regina will be on site at Allan Composite School on Saturday, June 13 to dispose of this chemical. As an added precaution, members of the Allan Fire Department will be on hand during the disposal.

Once the chemical was found, we worked with Envirotec and the RCMP unit to ensure that all necessary precautions were taken to protect our students and staff.

Please contact me if you have any questions.
