<p>AP-432</p> <p>ILLNESS IN CARE</p>	<p>Date of implementation: Fall 2020</p> <p>Date of update:</p>
	<p>Related Administrative Procedures:</p> <p>AP-410 Safety</p> <p>AP-413 Administering Essential Medication and Procedures to Students</p> <p>AP-428 Temporary Exclusion of Students for Safety or Medical Reasons</p>

Purpose: To provide guidance to employees ensuring safe care for students who become ill while in our care.

Parents are expected to keep students home when they are sick. We recognize that students may become ill while in our care.

Procedures:

- 1) If a student presents with symptoms of being ill, check to see if they have underlying health conditions that may need medication/medical attention (i.e. anaphylaxis, life threatening condition, etc.). Follow instructions on medical forms (refer to AP-413 Administering Essential Medication and Procedures to Students).
- 2) If the illness appears to be life threatening, phone 9-1-1.
- 3) Potential or confirmed communicable disease procedures:
 - a) Staff members and students are required to comply with the provisions of *The Public Health Act, 1994*, and the *Communicable Diseases Regulations*.
 - b) When a teacher or principal is made aware that a student, staff member or contractor may be infected with a communicable disease as defined in the *Communicable Diseases Regulations*, the following action shall be taken.
 - i) Arrange for the isolation and/or return home of the student or staff member as prescribed in the *Communicable Diseases Regulations*. A student in isolation must be carefully and continuously visually monitored.
 - ii) Public Health has a list of communicable diseases for which they need to be notified.
 - iii) If you are required to notify Public Health of the communicable disease, also notify your school Learning Superintendent via email by end of the school day.

- iv) School divisions will follow communication directions by Saskatchewan Health Authority. Other communications from the school will be governed by privacy legislation.
- c) Once the student leaves, staff must wash their hands and ensure all areas that the sick student touched are cleaned and disinfected. Items that cannot be cleaned and disinfected should be removed from the area and stored in a sealed container for a minimum of three (3) days.
- 4) The Director and/or designate may develop protocols from time to time to address specific illnesses and diseases.
