

2022-2023 Course Schedule and Selection for grade 10—12 students

These are the course selection sheets for your grade 9 to 11 child. You will see that some boxes have 1 choice while others you could have 2 or 3 choices. Your child will need to pick a class when there is more than one choice. Most of next year will be a semestered system, except for semester 1 the first two periods will be a mini block.

I have attached a graduation plan document to help guide your choices. If your child has post-secondary plans be careful of what Science or Math classes you choose not to take, it could create restrictions on your after-school plans. In grade 11 and 12 you can choose E-Learning options, but these courses are best suited for a student that is a good independent learner.
