

SCC Principal's Report
Monday March 9th, 2015

- New Sciences in 2015 – 2016: Physical Science 20, Health Science 20, and Environmental Science 20, Earth Science 30, and Computer Science 20. Yes there are many changes and it will be important for students to know which classes they need particularly when determining the grade 12 prerequisites.
- Other new courses include: Native Studies 10, Theatrical Arts 20 / 30, Fashion and Textiles 30, and Foods 30.
- We are looking at possible splitting PE into genders. We notice very few girls take PE beyond grade 10. We may do this in grade 9 this upcoming year.

Our course selection process will take place at the end of March. Course catalogues will be distributed mid-month. Our Student services teachers have also been visiting with students about course selection and planning for next year. Parents will be notified as the pieces of the process come together.
